

100-1000PPM Cosmetic Peptide Acetyl Hexapeptide 51 Amide Powder In Anti Age

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Hongbaiyi
- Certification: HPLC
- Model Number: HBY-Acetyl Hexapeptide-51 Amide
- Minimum Order Quantity: 1-500g
- Price: Negotiable
- Packaging Details: 1-500g /plastic bottle
- Delivery Time: 3~5 days, upon receipt of payment
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 5000kg per month

Product Specification

- INCI Name: Acetyl Hexapeptide 51 Amide
- Cas No.: N/A
- Function: Enhance The Natural Mechanisms To Diminish The DNA Damage That Several Factors Produce Along With The Years, Protecting Genomic Integrity. Reduce Existing Cellular DNA Damage And Delay Senescence Of Cells, Therefore Helping To Obtain A Younger Skin Aspect
- Recommended Use Level: 100-1000PPM
- Storage: Keep In Dark And Cool Dry Place (-5 To 8°C)
- Appearance: White To Off-white Powder
- Odor: Slightly Characteristic Odor
- Theoretical MW: 819.94
- Purity (HPLC): ≥95.0%
- Applications: Anti-Age
- Highlight: Anti Age Acetyl Hexapeptide 51 Amide,

Product Description

100-1000PPM Cosmetic Peptide Acetyl Hexapeptide 51 Amide Powder In Anti-Age

Basic Information of Acetyl Hexapeptide-51 Amide Peptide:

INCI Name	Acetyl Hexapeptide-51 Amide
Cas No.	N/A
Recommended use level	100-1000PPM
Appearance	White to off-white powder
Purity (HPLC)	≥95.0%
Applications	Anti-Age
MOQ	1g
Storage	-5 to 8°C

What is the Cosmetic Peptide Acetyl Hexapeptide 51 Amide?

Acetyl Hexapeptide 51 Amide is a synthetic peptide that is similar to the naturally occurring peptide acetyl hexapeptide-51 amide. Acetyl hexapeptide-51 amide is a known muscle relaxant, and it is thought to work by blocking the release of acetylcholine, a neurotransmitter that is responsible for muscle contraction.

When Acetyl Hexapeptide 51 Amide is applied to the skin, it is absorbed into the epidermis and dermis. It then travels to the neuromuscular junction, where it blocks the release of acetylcholine. This prevents the muscles from contracting, which can help to reduce the appearance of wrinkles and fine lines.

Acetyl Hexapeptide 51 Amide has been shown to be effective in reducing the appearance of wrinkles and fine lines on the face, neck, and décolletage. It is also effective in reducing the appearance of crow's feet and frown lines.

Acetyl Hexapeptide 51 Amide is generally considered to be safe and well-tolerated. However, it is important to note that some people may experience skin irritation. It is also important to avoid using Acetyl Hexapeptide 51 Amide if you are pregnant or breastfeeding.

100-1000PPM Cosmetic Peptide Acetyl Hexapeptide 51 Amide Powder In Anti-Age is a cosmetic peptide powder that is used in anti-aging products. It is a synthetic peptide similar to the naturally occurring peptide acetyl hexapeptide-51 amide. Acetyl hexapeptide-51 amide is a known muscle relaxant, and it is thought to work by blocking the release of acetylcholine, a neurotransmitter that is responsible for muscle contraction.

100-1000PPM Cosmetic Peptide Acetyl Hexapeptide 51 Amide Powder In Anti-Age is typically used in concentrations of 0.1-1% in skincare products. It is generally considered to be safe and well-tolerated, but it is important to note that some people may experience skin irritation.

Summary of the Cosmetic Peptide Acetyl Hexapeptide 51 Amide Powder In Anti-Age:

Type: Cosmetic peptide powder

Use: Anti-aging products

Benefits: Reduces muscle contraction, which can help to reduce the appearance of wrinkles and fine lines

Concentration: Typically used in concentrations of 0.1-1% in skincare products

Safety: Generally considered to be safe and well-tolerated, but some people may experience skin irritation

Functions of Acetyl Hexapeptide 51 Amide

Reduces muscle contraction: This is the main function of Acetyl Hexapeptide 51 Amide, and it is responsible for its anti-aging effects. When Acetyl Hexapeptide 51 Amide blocks the release of acetylcholine, it prevents the muscles from contracting. This can help to reduce the appearance of wrinkles and fine lines.

Protects DNA: Acetyl Hexapeptide 51 Amide has also been shown to protect DNA from damage. This is important because DNA damage can lead to premature aging and other skin problems.

Promotes collagen production: Acetyl Hexapeptide 51 Amide may also help to promote collagen production. Collagen is a protein that is essential for maintaining the skin's elasticity and firmness. Acetyl Hexapeptide 51 Amide is generally considered to be safe and well-tolerated. However, it is important to note that some people may experience skin irritation. It is also important to avoid using Acetyl Hexapeptide 51 Amide if you are pregnant or breastfeeding.

If you are considering using a product that contains Acetyl Hexapeptide 51 Amide, it is important to talk to your dermatologist first. They can help you to determine if the product is right for you and can advise you on how to use it safely.
